App Composer

Wanna Start a rIoT?

START BUILDING APPS FAST — **SO RADICAL, SO EASY**

# App Composer – Forever Ends Slow, Complicated App Development

Get ready to inject real-time intelligence and efficiency into your business operations really fast - coding optional. Decisyon App Composer (DAC) has a unique, visual application development environment that leverages Predix and native microservices to accelerate the creation of Industrial Internet of Things (IIoT) solutions.

Whatever the data sources - devices, business system or social channels - DAC enables you to deliver the right information to the right people at the right time. Think smarter decision-making, more profitable operations, and dramatically faster "speed to value" for developers, business analysts, solution architects and operators. Start assembling powerful asset and process optimization applications — all at radical speed.

Cause a Commotion – Drag, Drop, Deploy

Yes, it really is that simple.

Want to maximize the productivity of your developers throughout the entire software development cycle? DAC provides an easy-to-use application development environment that allows multiple designers and developers to work in parallel.

Key out-of-the-box DAC functionality includes:

- **Data management services** – aggregates and orchestrates data from your connected devices, business systems, social media, and other channels.

- **Visualization and Analytics** – empowers your end users to perform BI anywhere, anytime, with a simple right-click.

- **Business Rules Management** – automates routine and exceptional decisions.

- **In-Context Collaboration** – provides the social tools for real-time decision-making and communication.

- **Connections to Business Ecosystem** – drives decisions and actions resulting from analysis directly back into your business and enterprise systems.
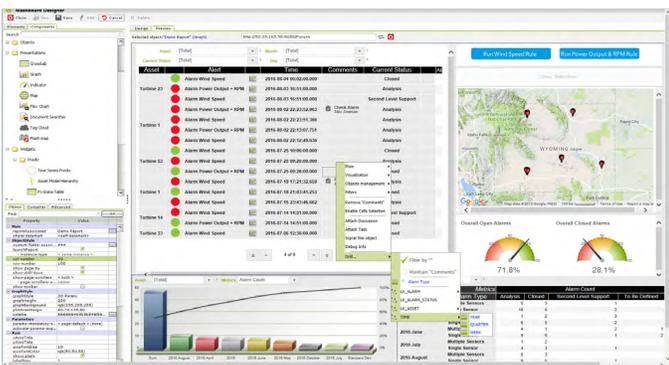

With DAC, everything is just a few clicks away. By radically simplifying the creation of solutions on Predix, you can deliver at a fraction of the time and cost. Even non-developers can build applications easily and independently like never before.

DAC Delivers the Speed You Need for the IIoT Data Deluge

Speed is your competitive advantage and DAC is the way. It fuels your innovation, decision-making, and ability to take action. DAC lets you leverage the data deluge to your advantage. From all business-centric channels, you'll be able to make timely decisions that boost your bottom line by:

- **Increasing development speed of new IIoT solutions without requiring any coding.**

- **Driving better outcomes that allow business operators to make smarter, real-time decisions.**

- **Giving solution architects and system integrators a way to quickly respond to changing client and market needs.**

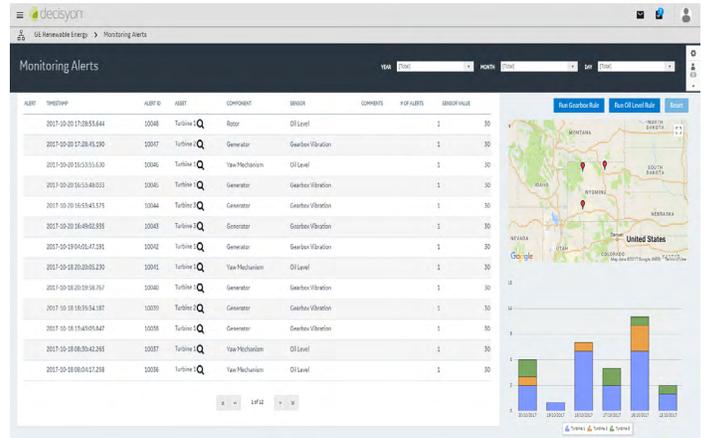

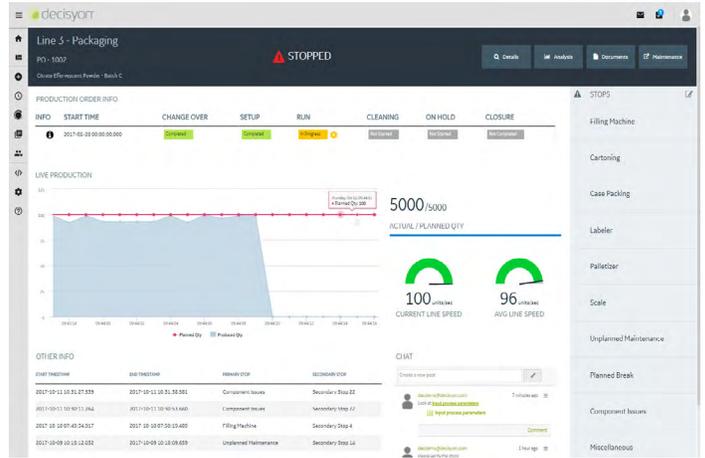

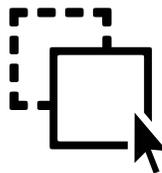

We Have Solutions For Your Industry

Oil and Gas, Manufacturing, Aviation, Renewables, and others. We have industry-specific solutions which not only bring speed and action to critical operations, they also enable rapid deployment. Learn more at **decisyon.com**.

CODE OPTIONAL

COMPREHENSIVE SOLUTION

SPEED TO OUTCOME

decisyon

App Composer

Data & Service Orchestration

Pull together and orchestrate relevant data and web services for analysis at the right time.

Business Intelligence

Utilize your apps and tools in a unified framework to gain insights and optimize decisions.

In-Context Collaboration

Communicate with key stakeholders in context in a unique collaboration environment.

Rules & Learning

Unifies your business rules into a single platform that learns as you grow.

About Decisyon

Decisyon enables business users to rapidly build solutions using a code-free visual software development environment. Our products accelerate your data journey from aggregation to visualization, insight, analysis and decision thru action. Decisyon offers the leading code-free visual software development environment for mission critical enterprise operations requiring real-time awareness and adaptability to their business operations and processes. We have developed and deployed many vertical solutions for the manufacturing, renewable energy, aviation, pharmaceutical, financial services, transportation and automotive industries. With built-in microservices such as data management, BI, mashboarding, rules engine, collaboration and execution, Decisyon offers a dramatic increase in speed to outcome for building and modifying vertical solutions. Decisyon's products and software solutions, ideally suited for IIoT applications running on any PaaS, are used in over 200 companies globally. Decisyon is headquartered in San Francisco, California.
