

THE COST OF INACTION

Paper boards, spreadsheets, and shift memory don't send an invoice — so the bill stays invisible. Here is what one F&B plant quietly loses every year, and the meter that recovers it.

WASTED TEAM TIME
~\$98K/yr
Minutes taken by hand, KPIs prepped in Excel, fixes re-discovered from scratch. **Nearly two-thirds of the loss.**

OEE ON THE FLOOR
\$80–150K
for every **1% OEE**. Most plants run at 75–85%.
PREVENTABLE DOWNTIME
10–20%
of unplanned downtime is recoverable with earlier escalation.

WHY THE BILL STAYS HIDDEN

Nearly 2 of every 3 recoverable dollars are simply your team's wasted time.

Four AI agents take that work back — so people run the line, not the paperwork.

- MeetingSense · auto minutes
- FixFinder · proven fixes
- MeetingInsight · instant recall
- DeepFind · right SOP, live

TURN THE METER AROUND THE RECOVERY CLIMB

NEXT STEP

Every day on the meter is recoverable. Starting now.

14-day LOOP pilot · one plant, one KPI, your real data. **Connects to your systems — no rip-and-replace.**
